

# pH Natural® Nitrile Exam Gloves

pH Natural® powder-free nitrile exam gloves provide excellent chemical and biological barrier protection and an ultra-clean TouchTek™ surface.

Proprietary pH Natural® technology helps to restore the skin's pH levels and reduce irritation in long-term use. A clinical study shows that it can reduce development of redness, scaling, irritation and roughness<sup>1</sup>.

Proprietary MilTek™ polymer technology delivers more uniform thickness providing unmatched tactile sensitivity at the fingers, high durability at the palm and cuff.

Non-latex nitrile offers superior abrasion and puncture resistance and the fully textured grip allows better handling of small parts and slippery objects.

TouchTek™ surfaces reduce irritants and contaminants to protect your hands and sensitive items you may be handling.
